

HAND-PICKED INTERIOR

Siobhan Pearson, the visionary behind Brentnall Great Australian Homes, also specialises in bringing homes to life with a keen eye for timeless and esteemed interior design. The stunning interior designs seen in Brentnall Homes have all been hand-picked by Siobhan, who thoughtfully selects pieces to complement the home's design and functionality.

Siobhan searches the world for her show-stopping pieces, including the six designer fireplaces used in the Inspirations display home at Huntington Downs on Queensland's Gold Coast. The purposefully selected six fireplaces (five gas and one wood) from UK company Real Flame really make a statement.

Large or small, when choosing Brentnall Homes to design and build your home, the possibilities are endless.

For more information, contact Brentnall Great Australian Homes on 1800 822 297.

UNCOMPROMISED AUDIO

The one thing the world's premier movie theatres and concert halls have over Synthesis® systems? More seats. JBL Synthesis® home theatre and music systems are designed and custom-installed to duplicate the electrifying performance characteristics of acclaimed venues such as the Samuel Goldwyn Theatre and the Sydney Opera House, but on a somewhat more intimate scale. Industrial-grade technologies, materials and engineering, from the most applauded professional brand, deliver systems of uncompromised power and authority in the homes of purists and enthusiasts, as well as film and music professionals everywhere. As Synthesis owners and audio reviewers alike will tell you, a more impressive and realistic residential sound system can't be found anywhere, at any price.

For more information, contact Chris Strom at Audio Connection on 0422 855 555 or visit www.advanceaudio.com.au

SIMPLICITY

TRIP — namely tracking, reporting, informing and planning — is the new lift industry innovation from Lift Shop. The online, live custom software package, TRIP has been designed to make managing each project simpler.

Clients can login via a secure password to TRIP, which allows them access to drawings, specifications, contract conditions, scope of works, installation program milestones, key account information and service details and records. Containing all information for every lift project, TRIP is a live service supporting staff, suppliers and client networks.

For more information, contact Lift Shop on 1800 440 714 or visit one of the national showrooms in Sydney, Melbourne, Brisbane or Perth.

CLEARLY INNOVATIVE

Challenging everything that is taken for granted in billiard table design and technology, Nottage Design has come up with striking new pool tables that blend ultra-modern styling with amazing new patented technology.

The two pool table designs are the world's first clear-playing surfaces featuring Vitrik — a transparent playing surface — on top of 15mm toughened glass. The ultimate in modern pool table design, the Vitrik surface replicates the rolling resistance of an average-speed cloth, meaning game play won't change at all. With the completely visible ball return system, there is no more guessing which ball just went in! Make a statement in your games room with this innovative creation from Nottage Design.
