

# Machine Room-less lifts dominate

## THE NEW TREND HAS BEEN UNDER WAY FOR 6 YEARS PLUS

Progress is slow in the lift industry. This is necessary to ensure the safe and reliable introduction of new technologies.

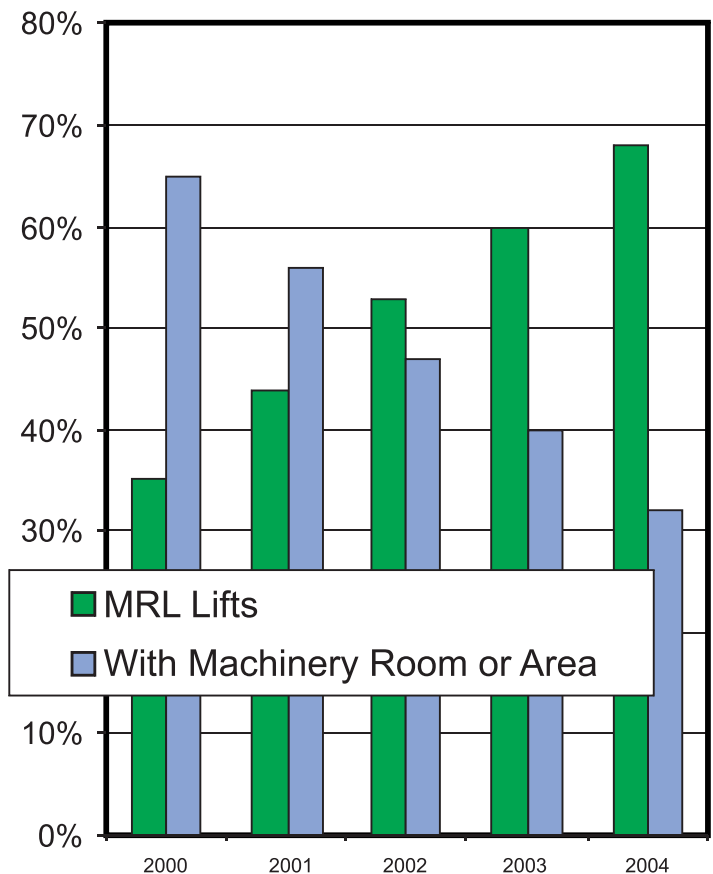

Mega-storey and expensive High Rise Lifts start trends and adoption of new systems then moves down to mass produced, quality controlled products for all.

Scientists design and invent, factories retool and upgrade, new materials are developed, regulatory approvals obtained, staff trained and test installations monitored and inspected. Only then can we offer the lifts to the market.

Technology is improving life in all areas. The LIFT SHOP SUPERMEC is further proof that innovation makes life better.
