

Lift Shop - The Leading Home Elevator Innovator

On 2 August 2012 - Lift Shop, Australia's multi-award winning leader in luxury residential lifts, was recognised by international industry authority, Elevator World, as an Australian success story.

Appearing on the cover of the magazine's August 2012 issue, Lift Shop and its US-based arm, Elevator Boutique, are profiled - from Lift Shop's inception in 2003 through to its ownership of the luxury lift category and ultimate expansion to the US in March 2012.

According to the Founder and CEO of Lift Shop and Elevator Boutique, Les Katz, "Elevator World is very highly regarded across the lift industry, in Australia and around the world. Like many of my colleagues, I have been reading this 'industry bible' for about 20 years, so for our success to be documented by Elevator World is an honour that we take very seriously."

"Being featured in Elevator World also reinforces our strong market position and is proof that, from our product quality to our partnerships and customer service, our business is on track. We are a large team, focused and dedicated to our craft. We will continue evolving and innovating world-class lift designs and technologies for the Australian and US markets. I wish to thank and applaud our network. We would not have achieved such success without all participants. The group of employees and suppliers plus clients who keep returning for their home elevator needs, all share in this honour. It's nice to be an Aussie being recognised on the international stage. Go the Aussies, OI OI OI !!!"
