

Lift Shop December Newsletter

[Follow Us](#)

This year Lift Shop has once again been involved with some remarkable projects, and we're very proud of the installations that have been completed... with many more still in progress.

Our lifts continue to be in high demand - for both their features and style. We increasingly find that the technology and safety features are a big draw card, but of course, customers also love the customisation possibilities, which are endless. Then there's the quality, which is unbeatable - there's just nothing else quite like it, so don't be fooled.

It continues to give us great pleasure to share some of our most recently celebrated projects with you and this month we feature:

Penthouse Panorama

When Lift Shop was approached to design a lift for this Melbourne apartment, we jumped at the opportunity to contribute to this impressive home. With floor to ceiling windows overlooking the ocean this residence is clearly in a league of its own and presented Lift Shop with the challenge of creating a lift which does justice to the rest of the property. Thankfully we didn't disappoint!

Our experienced consultant based in Melbourne worked closely with the client and engineers to design a through car ElfoLift which boasts polished stainless steel doors and cabin.

Palm Beach Perfection

Collaborating with MPRDG (formerly JPR) and Buildline Constructions again, the design expertise of Lift Shop was called into play to ensure every detail and dimension was factored into for this exquisite holiday home in Sydney's playground of the rich and the famous.

Of critical importance was having a lift design that would complement the centrally located four level steel shaft structure going through a three story high private rear courtyard with rock features and finishing at

a timber deck on the upper level connecting the two wings of the home.

Builders Own Display Home

The builder of this stunning new home in Southern Sydney wanted his own home to serve also as a display to potential clients - this is what you'll get if I'm you're builder!!

Having looked at several alternative lift suppliers, he knew what he was looking for and could appreciate the superior quality offered by our traction drive Supermec lift. The fact that it is power failure proof and uses very little energy just continued to tick the boxes

Historic Regatta Hotel

Following the damage caused by the 2011 Brisbane floods, the historic Regatta Hotel in Toowong recently underwent a complete renovation and upgrade. To provide convenience and easy access from the rear car park, Lift Shop was called in to provide one of our in-stock P2 limited mobility access platform lifts.

With only a small pit of 255mm required, the builders loved the minimal amount of site preparation required and were easily able to accommodate the platform into the small area available.

Feedback

We love to hear what our customers think. If you have any feedback on any of the above stories, or would simply like to tell us about your Lift Shop lift experience or project, please [contact us](#).
