

Check out some of our latest stunning projects from the award winning leader.

September 2015

News from the award winning leader

Lift Shop continues to be involved with some remarkable projects, and we're very proud of the installations that have been completed... with many more still in progress.

Our lifts continue to be in high demand - for both their features and style. We increasingly find that the technology and safety features are a big draw card, but importantly, customers love the design flexibility. Then there's the quality, which is unbeatable - there's just nothing else quite like it.

It continues to give us great pleasure to share some of our most recently celebrated projects with you and this month we feature:

*Exclusive In-Cabin Self-Rescue
Feature Now Included As Standard*

For extra peace of mind for our valued clients, we are happy to announce that both our ElfoLift and ElfoLift 2 range will now have our exclusive in cabin self-rescue as a standard feature...

Sophisticated Solution

This stately terrace home in Albert Park has been lovingly updated and modernised over the years whilst still keeping its original charm. The only thing lacking however has been easier access between the two main levels...

Can You Repeat That Please

This was the second time we have installed a lift for the owner of this beautiful new Sydney harbourside property. It was also the sixth time we have worked with the experienced team from Zack Smith Constructions...

Cowhide Custom Finish

Whilst we have a great range of standard and optional finishes available from our manufacturers, we love seeing what clients also choose to finish off their lift cabins. In this case, the FreedomLift drive wall was covered...

nbn™ update

With the rollout of the National Broadband Network, the safety of some telephone systems may be affected, including those in lifts. Whilst this is being addressed with all new lift installations, phones in lifts already in operation should be checked. As such, if you live in an area where the NBN has been rolled out, we encourage you to test your lift phone by simply giving us a call, this will not be a problem for us and we'll be happy to hear from you. Of course we will continue to test all lift phones as part of our regular servicing activities.

Feedback

We love to hear what our customers think. If you have any feedback on any of the above stories, or would simply like to tell us about your Lift Shop lift experience or project, please [contact us](#).
